

2025 Fall Tri-Annual

- If you encounter any issues with the Scorekeeper app during the match, please pause the match and proceed to the tournament table immediately. If necessary, we will adjust the Sudden Death time.
- Before starting play each round, bring up the match in Scorekeeper and verify that rosters and skill levels are accurate before you begin the match.

- When matches are released, log into Scorekeeper and use the **Filter Session** option to choose **Fall 2025 if needed**, this is where you will see matches for the Tri-Annual. The match will be under the heading **TOURNAMENT**.
- Sudden Death countdown will begin either from the time we Release matches to the app OR when the round is scheduled, whichever is later. **Note: this tournament will be continuous play once the first round of matches are completed.**
- While you are keeping score for a match, you can pull down on the scoring screen to see what time Sudden Death begins. **Once Sudden Death is less than one hour away, you will see a countdown instead of a time.**
- If you end up in Sudden Death, the app will automatically adjust scoring to account for Sudden Death rules. In 8-Ball, the race to two games with two team points being awarded for the first game and one team point being awarded for the second if a second game is needed. In 9-Ball, all points earned will be doubled.
- Once your team match is over, verify the final score with your opponent before submitting.
- Ensure that **BOTH** teams submit the match in the Scorekeeper App.

If you experience the app freezing during a match, have someone else take over. Refresh your app and then resume scoring by taking back over. Please report the issue if you encounter during play.

Remember, it is an honor to test Scorekeeper for tournaments. We provided valuable feedback during our initial use of the Scorekeeper App. Let's provide that same level of feedback while testing this weekend!
